

DIGITAL TRANSFORMATION

DIGITAL TRANSFORMATION

Almost all devices and systems are becoming connected. They are becoming more aware of their surroundings and have to make more intelligent decisions.

Megatrends that drive transformation are:

- Universal connectivity
- Growing amount of data
- Growing focus on environment
- Intelligent solutions and services
- Globalisation of value chains
- Exploratory analytics and visualization

This will have an impact on almost every industry. Challenges industries are facing:

- Lack of qualified employees
- Concerns on cloud security, data and IP protection
- Likely to disrupt your current business
