ABOUT STEPHANIE THOMAS

Stephanie has been a member of the Zacco UK team since 2023. She is a European Patent Attorney with over ten years of experience in both UK and European patent practice. Stephanie holds a Masters in Physics from the University of Birmingham. Much like her degree which spanned a broad technical spectrum, from atomic physics to astrophysics, she has drafted and prosecuted patent applications across a wide range of technologies, from everyday household solutions (such as a novel zipper) to more high tech inventions including IoT and digital communications, software-implemented inventions including machine learning, as well as laser propulsion and even a jet pack.

Stephanie works with clients locally, based in the West Midlands, as well as multinational corporations and her favourite part about the role is diving into a new area of technology to learn from an inventor about their proud achievements.

Stephanie is also a member of Zacco's Design team, with focus on UK Registered Design filings.

AREAS OF EXPERTISE

Services

Patent Drafting
Patent Prosecution
Freedom to Operate
Design Prosecution

Technical field

Artificial Intelligence
Digital Signal Processing
Electronics
Information Technology
Internet of Things (IoT)
Machine Learning
Materials Technology & Nanotech
Mechanical Engineering
Nuclear Technology
Physics
Sensor and Measurement Technology
Signal Processing

Industry expertise

Aerospace & Defence
Automotive
IT & Software
Medtech
Offshore
Sustainability / GreenTech / CleanTech
Telecommunications
