ABOUT KRISTOFFER VANDBORG BRO

Kristoffer has worked as a consultant in intellectual property law since 2018. He is a certified Danish patent agent (CDPA) and has several years of experience in litigation support, before both the Danish Maritime Courts and the EPO.

After completing his master's degree in biomedical engineering in 2014, Kristoffer worked as an R&D engineer in the private sector, developing minimally invasive devices for cardiovascular repair and replacement.

These experiences provide Kristoffer with a unique skillset and insight into client needs in the field of IP consulting, as he has worked on both the practical and judicial aspects of inventions and patents. At Zacco, Kristoffer specialises in patent drafting, patent prosecution, oppositions, IP strategy consulting, freedom to operate, and litigation support.

Kristoffer has been consecutively recognised by Managing IP as a Rising Star since 2023.

Further, Kristoffer has a position as external lecturer at the CEIPI IP Business Academy at the University of Strasbourg, teaching IP matters within the field of robotics.

In addition, Kristoffer is a member of The Association of Danish Intellectual Property Advisors, ADIPA.

Kristoffer is also a voluntary board member at Aarhus 1900, a large sports club in Aarhus, Denmark, with more than 3.700 active members.
