## ABOUT JANE MØLLER NIELSEN

Jane joined Zacco in 2008. She specializes within IPR fields covering patent drafting, prosecution, surveillance, and infringement evaluations. Jane works primarily within the IPR field bordering between Mechanics, Optics and Chemistry. Further, Jane has a large experience with patent drafting and prosecution in the field of medical devices.

With basis in her University training, Jane has worked intensively within the field of physical chemistry and optical spectroscopy / microscopy prior to joining Zacco. Besides a thorough training within the field of chemistry, Jane has a special expertise within MS, IR, Raman, surface-enhanced Raman, UV, NMR, and ultra fast time-resolved spectroscopy.

Jane holds a Master of Science in Physical Chemistry from the University of Aarhus, where she specialized in the field of optical spectroscopy and the initial processes involved in chemical reactions. Jane further holds a Ph.D. in Chemical Physics from the University of Lund, where she worked in a large consortium focusing on hydrogen production as an environmental friendly energy source using photosynthesis in Nature as the model system.

## AREAS OF EXPERTISE

### Services

Patent Monitoring  
Strategy Implementation  
Portfolio Management  
Competitor Watch  
Freedom to Operate  
Technology Watch  
Strategy Development  
Utility Models  
Patent Drafting  
Patent Landscaping  
Patent Oppositions and Appeals  
Patent prosecution  
Novelty Search and Validity Search

### Technical field

Sensor and Measurement Technology  
Mechanical Engineering  
Chemistry  
Electronics  
Industrial Chemistry  
Materials Technology & Nanotech  
Mechatronics  
Food Technology  
Polymers  
Physics  
Inorganic Chemistry  
Process Technology  
Electrochemistry

### Industry expertise

Medtech  
Furniture  
Offshore  
Life Science  
Food & Beverage  
Sustainability / GreenTech / CleanTech  
Building & Construction  
Agriculture  
Hygiene Products  
Energy, Gas, Oil & Power
