## ABOUT BERND LIENAU

Bernd joined Zacco in 2019 as a Trainee Patent Attorney and is currently occupied with acquiring the necessary skills to qualify as German and European Patent Attorney.

Bernd graduated in 2019 with a Master of Science in Physics at the University of Hamburg. The focus of his Master's thesis was the improvement of a quantum gas experiment, upgrading both hard- and software, and therefore he gained experience in digital image processing, computer sciences as well as mechanical engineering, CAD and optics.

At Zacco, Bernd works mainly with energy and offshore technology, including renewables, offshore drilling and oilfield products. He supports clients with patent drafting, freedom-to-operate evaluations and general patent management.
